Dear Mr. Dan Reeb:

As you are aware, Electrical District No. 2 has planned to build a 69kV line with an underbuilt 12kV circuit in the easement we have across your property. This easement has been previously determined in consultation with you. In all, but a few locations, the new line will be in the same alignment as the existing 12kV distribution line currently on your property. Survey crews have had flags placed at the new pole locations for some time now. The purpose of the line is to provide transmission to ED2's first new substation to be built in some thirty years. The new substation is located approximately one-third of a mile south of Highway 287 on Hacienda Road. The substation has already been constructed and will be energized as soon as the 69kV line can be built.

We expect to begin construction of the line early in 2010. When the existing distribution line is switched over to the new poles, you may experience a brief disruption of electric service. The line construction has been contracted to Sun Electric. If you have any questions now or during construction of the line, please call Mr. David Wilson, Manager of Engineering and Operations for ED2 at 723-7741.

Sincerely,

Thomas S. Martin
General Manager
